

## Scenario:

You are on a low carbohydrate diet in Columbia. You do not have a lot of time to find keto-friendly recipes online and you would prefer a place to find plenty of low carb recipes in one place.

Task 1: Log in to the app and go to the recipe tab.

Task 2: Sort the recipes from most liked to popular.

Task 3: Find the 2nd most popular recipe.

Task 4: Give the recipe a thumbs up.

## Notes:

What changes you should make to your application:

1. It would be good for me to add a comment section in the recipes so people could suggest different things.
2. It would be good to add a substitution tab for certain ingredients.
3. It would be good to add a back button.
4. I could add different pages to the recipes selection instead of a "load more" button.

What you need to keep the same for your application:

1. I like how I have a sort button in the recipe selection.
2. The thumbs up and thumbs down rating system.
3. The home screen selection is really easy to navigate so I would keep it the same.
